# computers & fluids

An  
International  
Journal

**Chief Editor: S. G. Rubin**  
Aerospace Engineering and  
Engineering Mechanics  
University of Cincinnati  
Cincinnati, OH 45221-0343, U.S.A.

**Co-editor: M. H. Bloom**  
Polytechnic Institute of  
New York, Route 110  
Farmingdale  
NY 11735, U.S.A.

## Regional Editors

**K. Oshima**  
Japan Society of Computational  
Fluid Dynamics  
2-7-7 Sekimachi-Kita  
Nerima-ku  
Tokyo 177, Japan

**R. Peyret**  
Département de Mathématiques  
CNRS-U.A. No. 168  
Université de Nice-Sophia-Antipolis  
Parc Valrose  
06034 Nice Cedex, France

**V. V. Rusanov**  
Russian Academy of Sciences  
Miusskaya Sq. 4  
125047 Moscow  
Russia

**C. Taylor**  
University of Wales  
Swansea SA2 1PP  
Wales  
U.K.

**T. Taylor**  
Applied Physics Laboratory  
The Johns Hopkins University  
Johns Hopkins Road  
Laurel, MD 20810, U.S.A.

## Editorial Advisory Board

**J. Adamczyk**  
Computational Fluid Mechanics  
Branch  
NASA Lewis Research Center  
21000 Brookpark Road  
Cleveland, OH 44135, U.S.A.

**T. Aki**  
National Aerospace Laboratory  
Jindajji-Higashi 7, Chofu  
Tokyo 182, Japan

**P. Bradshaw**  
Mechanical Engineering  
Stanford University  
Stanford, CA 94395, U.S.A.

**M. Crochet**  
Université Catholique de Louvain  
Louvain-la-Neuve  
Belgium

**H. Daiguji**  
Faculty of Engineering  
Tohoku University  
Aoba, Sendai 980  
Japan

**S. C. R. Dennis**  
University of Western Ontario  
London, Ontario, Canada

**C. Fletcher**  
Mechanical Engineering  
University of Sydney  
Sydney, New South Wales  
Australia 2006

**B. Gustafsson**  
University of Uppsala  
Sturegatan 4 B 2 tr  
Uppsala, Sweden

**P. K. Khosla**  
Aerospace Engineering and  
Engineering Mechanics  
University of Cincinnati  
Cincinnati, OH 45221, U.S.A.

**E. Krause**  
Aerodynamisches Institut  
der Rheinisch-Westfälischen  
Technischen Hochschule  
Aachen, Germany

**P. Kutler**  
Applied Computational Aerodynamic  
Board  
NASA Ames Research Center  
Moffet Field, CA 94035, U.S.A.

**G. Moretti**  
31 Casino St. Apt. 2K  
Freeport  
NY 11520, U.S.A.

**M. Napolitano**  
Istituto di Macchine ed Energetica  
Politecnico di Bari  
Via Re David 200  
70125 Bari, Italy

**M. Pandolfi**  
Politecnico di Torino  
Torino, Italy

**V. C. Patel**  
Institute of Hydraulic Research  
The University of Iowa  
Iowa City, IA 52242, U.S.A.

**K. Roesner**  
Institut für Mechanik  
6100 Darmstadt, Germany

**P. Roache**  
Ecodynamics  
P.O. Box 9229  
Albuquerque, NM 87119, U.S.A.

**B. Rozhdestvensky**  
Russian Academy of Sciences  
Miusskaya Sq. 4  
125047 Moscow, Russia

**J. South**  
NASA Langley Research Center  
Hampton, VA 23665, U.S.A.

**J. C. Tannehill**  
Iowa State University  
Ames, IA 50010, U.S.A.

**A. van de Vooren**  
Mathematical Institute  
University of Groningen  
P.O. Box 800  
9700 AV Groningen  
The Netherlands

**F. Walkden**  
University of Salford  
Salford M5 4WT, England

**D. Whitfield**  
Computational Engineering  
Mississippi State University  
P.O. Box 6176, MS 39762,  
U.S.A.

**G. Widhopf**  
Aerospace Corporation  
P.O. Box 92957  
Los Angeles, CA 90009, U.S.A.

**R. T. Williams**  
Meteorology  
Naval Postgraduate School  
Monterey, CA 93940, U.S.A.

**M. Wolfshtein**  
Technion—Israel Institute  
of Technology  
Haifa, Israel

**R. W. Yeung**  
Naval Architecture and  
Offshore Engineering  
University of California  
Berkeley, CA 94720, U.S.A.

**You-lan Zhu**  
Computing Center  
Academia Sinica  
Beijing, China

## Publishing Office

Pergamon Press Ltd, Pergamon House, Bampfylde Street, Exeter EX1 2AH, England [Tel. (0392) 51558; Fax 425370].

## Subscription and Advertising Offices

North America: Pergamon Press Inc., 660 White Plains Road, Tarrytown, NY 10591-5153, U.S.A.

Rest of the World: Pergamon Press Ltd, Headington Hill Hall, Oxford OX3 0BW, England [Tel. (0865) 794141; Fax 60285].

## Subscription Rates

Annual institutional subscription rate (1992), £365.00 (US\$660.00); two-year institutional rate (1992/93), £693.50 (US\$1254.00). Sterling prices are definitive. U.S. dollar prices are quoted for convenience only, and are subject to exchange rate fluctuation. Prices include postage and insurance and are subject to change without notice. Subscription rates for Japan are available on request.

## Back Issues

Back issues of all previously published volumes, in both hard copy and on microform are available direct from Pergamon Press offices.

Published Quarterly in January, April, July and October

Copyright © 1992 Pergamon Press Ltd

## LIST OF CONTENTS

### NUMBER 1

- |   |            |   |
|---|------------|---|
| <b>A. J. Basu, A. Prabhu<br/>and R. Narasimha</b>                       | <b>1</b>   | Vortex sheet simulation of a plane "canonical" mixing layer                                     |
| <b>C. P. Mracek, M. J. Kim<br/>and D. T. Mook</b>                       | <b>31</b>  | Three-dimensional potential flows by a vorticity-panel method                                   |
| <b>J. A. Masad, A. H. Nayfeh<br/>and A. A. Al-Maaitah</b>               | <b>43</b>  | Effect of heat transfer on the stability of compressible boundary layers                        |
| <b>H. J. Smolders,<br/>E. M. J. Niessen and<br/>M. E. H. van Dongen</b> | <b>63</b>  | The random choice method applied to non-linear wave propagation in gas-vapour-droplets mixtures |
| <b>Yannis Kallinderis and<br/>Judson R. Baron</b>                       | <b>77</b>  | A new adaptive algorithm for turbulent flows  |
| <b>D. Roekaerts</b>   | <b>97</b>  | Monte Carlo PDF method for turbulent reacting flow in a jet-stirred reactor                     |
| <b>W. Schröder and<br/>G. Hartman</b>                                   | <b>109</b> | Implicit solutions of three-dimensional viscous hyper-sonic flows                               |
| <b>X. Wen and D. B. Ingham</b>  | <b>133</b> | Flow induced by a submerged source or sink in a three-layer fluid                               |

#### I *Software Survey Section*

#### IV *Announcements*

### NUMBER 2

- |  |            |  |
|--|------------|--|
| <b>Norio Arai and<br/>Masatomo Komatsu</b>       | <b>145</b> | Active control of the hydraulic forces of a body by a splitter plate   |
| <b>Takeo Kajishima<br/>and Yutaka Miyake</b>     | <b>151</b> | A discussion on eddy viscosity models on the basis of the large eddy simulation of turbulent flow in a square duct                   |
| <b>T. Ikohagi, B. R. Shin<br/>and H. Daiguji</b> | <b>163</b> | Application of an implicit time-marching scheme to a three-dimensional incompressible flow problem in curvilinear coordinate systems |
| <b>Yoshihiro Mochimaru</b>                       | <b>177</b> | Numerical simulation of flow past a circular cylinder under a magnetic field   |
| <b>Yasuyoshi Horibata</b>                        | <b>185</b> | Numerical simulation of a low-Mach-number flow with a large temperature variation  |

- |   |     |   |
|---|-----|---|
| <b>Hiroki Honma,<br/>Hirohiko Maekawa<br/>and Tomohiro Usui</b> | 201 | Numerical analysis of the nonstationary oblique reflection of weak shock waves  |
| <b>Y. Hozumi and<br/>Y. Yoshizawa</b>                           | 211 | Numerical analysis of dust particles motion inside gas bubbles for flue gas desulfurization in a jet bubbling reactor |
| <b>K. Nanbu and S. Igarashi</b>                                 | 221 | Three-dimensional low-density flows in the spiral grooves of a turbo-molecular pump                                   |
| <b>H. Nomura, S. Aso<br/>and M. Nishida</b>                     | 229 | Numerical simulation of opposing sonic jets   |
| <b>Takashi Yamane</b>   | 235 | Aeroelastic tailoring analysis for advanced turbo propellers with composite blades                                    |
| <b>David A. Kopriva</b>   | 247 | Spectral solution of inviscid supersonic flows over wedges and axisymmetric cones                                     |
| <b>Young-Cheol Ahn<br/>and Michael E. Ryan</b>                  | 267 | Analysis of extrudate swell from an annular die   |
| <b>K. Srinivas</b>  | 291 | An explicit spatial marching algorithm for Navier-Stokes equations  |
| <i>Technical Note</i>   |     |   |
| <b>Tapan K. Sengupta</b>  | 301 | Solution of the Orr-Sommerfeld equation for high wave numbers   |

I *Software Survey Section*

**NUMBER 3**

- |   |     |  |
|---|-----|--|
| <b>D. B. Ingham, B. Yan<br/>and B. R. Morton</b>                                    | 305 | The fluid flow induced by large-amplitude oscillations of a cascade  |
| <b>V. P. Korobeinikov,<br/>S. B. Gusev, P. I. Chushkin<br/>and L. V. Shurshalov</b> | 323 | Flight and fracture of the Tunguska cosmic body into the Earth's atmosphere  |
| <b>Koji Morinishi</b>   | 331 | A finite difference solution of the Euler equations on non-body-fitted Cartesian grids   |
| <b>V. A. Gushchin and<br/>V. N. Konshin</b>   | 345 | Computational aspects of the splitting method for incompressible flow with a free surface  |
| <b>T. S. Lee</b>  | 355 | Numerical computation of fluid convection with air enclosed between the annuli of eccentric heated horizontal rotating cylinders |
| <b>Shigeru Aso and<br/>Masanori Hayashi</b>   | 369 | Numerical experiments on unsteady shock reflection processes using the thin-layer Navier-Stokes equations                        |

- |   |     |  |
|---|-----|--|
| A. A. Fursenko,<br>D. M. Sharov,<br>E. V. Timofeev and<br>P. A. Voinovich | 377 | Numerical simulation of shock wave interactions with channel bends and gas nonuniformities |
| Marie-Hélène Lallemand,<br>Hervé Steve and<br>Alain Dervieux              | 397 | Unstructured multigriding by volume agglomeration: current status                          |
| S.-W. Kim and<br>T. J. Benson   | 435 | Comparison of the SMAC, PISO and iterative time-advancing schemes for unsteady flows       |
| F. Moukalled and S. Acharya   | 455 | Application of an adaptive grid procedure for the calculation of turbulent separated flows |
|   |     | I <i>Software Survey Section</i><br>GYDROTEM-PIPE; GIDROTEM-POR; GIDROTEM-OUT              |

#### NUMBER 4

- |  |     |   |
|--|-----|---|
| Qingping Shi and<br>R. J. Ribando                          | 475 | Numerical simulations of viscous rotating flows using a new pressure-based method                   |
| Tuncer Cebeci,<br>Hsun H. Chen and<br>Kalle Kaups          | 491 | Further consideration of the effect of curvature on the stability of three-dimensional flows        |
| Stephen A. Jordan  | 503 | An iterative scheme for numerical solution of steady incompressible viscous flows                   |
| D. Lee and J. J. Chiu                                      | 519 | Computation of physiological bifurcation flows using a patched grid                                 |
| Tsai-An Yu and Ta-Jo Liu                                   | 537 | Numerical solution of a Newtonian jet emanating from a converging channel                           |
| G. Popov, S. Sankar,<br>T. S. Sankar and<br>G. H. Vatistas | 551 | Liquid sloshing in rectangular road containers  |
| K. C. Chang and W. J. Wu                                   | 571 | Numerical boundary conditions at the interface in a confined flow computation                       |
| Lisa J. Fauci  | 583 | Peristaltic pumping of solid particles  |
| J. Piquet and P. Queutey                                   | 599 | Navier-Stokes computations past a prolate spheroid at incidence—I. Low incidence case               |
| Björn Sjögreen   | 627 | Iterative methods for stationary solutions to the steady-state compressible Navier-Stokes equations |

**Tao Tang and  
D. B. Ingham**

**647** Multigrid solutions of steady two-dimensional flow  
past a cascade of sudden expansions

*Technical Note*

**David H. Schultz,  
Steven Schwengels and  
Gunol Kocamustafaogullari**

**661** Influence of viscous dissipation in a fluid between  
concentric rotating spheres
